

Last time buy notification for NORMARC 7000A modules

This last time buy notification (LTB) concerns spare modules specific to the NORMARC 7000A Instrument Landing System (ILS). The NORMARC 7000A was delivered between 1995 and 2004.

Spare modules affected

The following modules or LRUs are covered by this LTB:

- LF 1223A Low frequency generator
- LPA 1230A Localizer power amplifier
- GPA 1231A Glide path course power amplifier
- GPA 1232A Glide path clearance power amplifier
- COA 1207A/B/C Change over assembly
- MB 1203A Motherboard

All other modules used in the NORMARC 7000A were carried over to the NORMARC 7000B, and are not affected by this LTB.

Order deadline

The modules listed above will be available for order while stocks last, latest until March 1st 2020. Orders received after this date may not be accepted.

How to order

For orders or enquiries, please contact support@indra.no

Upgrade to NORMARC 7000B

What happens when spare modules are no longer available? The current version of the NORMARC ILS, NORMARC 7000B, is compatible with all older antenna systems. This means that an older ILS can easily be upgraded with new electronics for continued operation and reduced operating costs.
